WITHOUT BETTING RACING IS DOOMED.

That is why I say there can be no racing without betting. The meetings will probably be held and the horses will run for a year, perhaps, the Jockey Club living it the hope that by the end of that time other legislation may be brought about. But for a permanent arrangement such a thing is impossible. The immense amount of capital invested would be as if ing-room before we went on, he said, "and he asked me to sign a little paper." "I think I will beat him—yes. the trouble. If John W. Gates bets \$50,000 on a race his commissioner 'snoops" it down, and nobody knows anything about it. I contend that the public has a right to know where this "wise" money goes.

PUBLIC CAN MAKE NO FAVORITES.

As it is, the rank and file are left floundering. They don't make their own favorites, and they know little or nothing about how the favorites are made, for they have no idea that Mr. Gates or Mr. Lewisohn or any of the other big millionaire plungers have bet their thousands until they read about it in the newspapers the next day.

Under the pari mutuel system there is none of this. Under this arrangement 7 per cent is deducted from all moneys bet. Two per cent goes to the Government and 5 per cent, to the Societe de Encouragement, which is the association fostering the improvement of the breed of horses in and train and race a horse and lay low for two and even three years, and

the betting public fears, and it is an unfortunate condition or practice that brings this about. I am not saying that it is crooked—evidently it is not, according to the English standards—but it certainly is not good sport. They call it qualifying or preparing a horse for a race, but to me it is deception, just the same.

"PULLING" CONDONED IN ENGLAND.

I mean by this the pulling of horses, starting them in races when they are never intended to win, giving them too much weight or starting them before they are in condition. I have ridden in races with horses for as long as two vears, and time after time I have known that the horses could win easily var.

have seen them pulled or lose by some other means. The meaning of this is that an owner will point a certain horse for a certain event. He will enter him in race after race, never intending him to win, but when the right spot comes the coup is made.

Of course, when a horse is quoted before one of the races he is not intended to win it is announced in the papers that he is not backed by his stable, and this perhaps saves some confusion in the minds of the betting public.

We hear of big wagers here, but the coups that are pulled off in England.

this perhaps saves some confusion in the minds of the betting public.

We hear of big wagers here, but the coups that are pulled off in England overshadow our operations. Thousands and thousands of pounds are bet there, but only when the owner thinks his horse is in the right spot. They will walt and train and race a horse and lay low for two and even three years, and then when the race they have been pointing for comes around they will go in and bet their thousands and generally win.

I have seen a horse in the Cesarewitch that I knew was fit and could win deliberately pulled and made to finish in the ruck, and then, two weeks later, go in and win the Cambridgeshire.
